### SA-60FA

#### Wet & Dry Separating Vacuum Cleaner (Environmental model)

1. One machine can work with two kinds of motive powers—either air pressure or motor-driven depends on the occasion.
2. Not only can extracting the waste but also separating fluid and dirt at the same time.
3. This product functions include vacuuming dust and metal shaving also extracting oil and CNC cutting Fluid. Dusts and shaved metal waste are sucked out by high-speed motor, which has strong suction.
4. The design of pressure tank discharges by air pressure, repeatedly extract and discharge oil and fluid to clean machines and flush oil grooves.
5. Filter repeatedly leaches impurities of cutting fluid, to ensure the cutting precision and protect cutting tool.

#### Portable Air Drilling Machine (Include Vacuum Suction Fixing Base)

- The novel vacuum suction fixing base can apply to coarse surfaces such as cement wall, lumber plywood, stone back, etc.
- The vacuum suction firms the machine onto the surface of the wall firmly and directly free of extra fixing devices.( It is necessary to confirm that the vacuum suction works indeed onto the surface prior to releasing the machine. )
- The air source shared by the vacuum suction and the machine demands one vent pipe only. Don't need two air sources.
- The water yield is valve-controllable and the water comes from either the drill chuck or the bores.
- The machine has stepless speed regulation and the max. free speed is 1,500 rpm.
- The ON/OFF switch controls over rapid and slow feed / escape.
- Drilling Machine can work with the small 4hp air compressor without the additional vacuum pump (vacuum generator)

### TWTB Series Multi-Function Torque Tester For Air , Electric Screwdriver

#### Display:

- Same time display of torque value & B.P.M., also available to set High, Low Pass torque value .
- Applicable to test forward, reverse torque value, optional to auto reset to zero & time to reset zero.
- Torque value unit: Nm, lbf.ft, lbf.in, kgf.m, kgf.cm
- The strength of filter wave is adjustable anytime, to reach its optimum state.

#### Transducer:

- Torque Range: 0.5~500 Nm.
- Accuracy: better than ±3%.
- With standard RS232 interface, connect to computer or printer with specific software.
- Voltage: AC100V~240V auto shift.

- Capacity: 2 kgs (for smooth iron)
- Weight: 0.31 kg
- Size: 32 x 4 x 5.5 cm (LxWxH)
- Air Cons. : 0.08 m<sup>3</sup>/min (3 SCFM)
- Sound Pressure: 72.6 dBA

- The conventional suction can only apply to smooth surfaces, but the novel vacuum suction can apply to coarse surfaces.apply temperature is 200 degrees centigrade.
- The air suction lifter can work as the air blow gun without using the suction.
- The maximal capacity of the vacuum suction lifter applying to smooth surfaces is up to 2 kgs.
- The vacuum suction can apply to not only objects suction in the water but also water suction.
- With the low air consumption, the 2-in-1 air suction lifter can work with the small 2HP air compressor without the additional vacuum pump (vacuum generator)
